Summary

From 2015 to 2019 I worked as a mining engineer and permanent site supervisor in the mining industry, and from 2019 to 2026 as a dangerous goods safety adviser for air and road transport at several organisations, including FedEx Express. Seeing that many operational problems could be solved with software, I studied computer programming and earned certifications in software development and testing. In 2026 I founded my own software company; I build, test and ship web platforms and mobile apps for dangerous goods, logistics and everyday life.

Experience

Founder · Software Developer

2026 – Present

Suphi Atılım Çeliköz - SafeCargo Yazılım Teknoloji ve Danışmanlık Hizmetleri

Since founding my company in 2026 I build my own products: industry platforms such as TMGD Asistanı and SafeCargo, the Kurye ve Nakliyat marketplace and Android apps for everyday life. I handle the idea, design, development, testing and release myself.

SaaS · Web · Mobile · Product development · Testing

Dangerous Goods Safety Adviser (DGSA)

2019 – 2026

Air and road · including FedEx Express

Safety advisory across air and road dangerous goods operations: regulatory compliance, classification, packaging, labelling, documentation, training and internal audits.

ADR · IATA DGR · Classification · Documentation · Audit · Training

Mining Engineer / Permanent Site Supervisor

2015 – 2019

Mining industry

Running field operations, supervising technical processes and ensuring regulatory compliance in an environment where production and safety have to be managed at the same time.

Field operations · Safety · Supervision · Compliance

Projects

TMGD Asistanı Web platform · SaaS

tmgdasistani.app

Brings the company, visit and document tracking that dangerous goods advisers and advisory firms run on spreadsheets and paper into one panel, with reminders.

Next.js 14, TypeScript, Tailwind CSS, Supabase, Resend, Capacitor, Leaflet, Playwright

Kurye ve Nakliyat Web and Android

kuryevenakliyat.com · Google Play

A marketplace that connects people with freight, courier and load requests to carriers; request creation, offer collection and comparison on the web and on Android.

Next.js 16, Expo (React Native), Supabase, Sentry, next-intl, Playwright

Benim Kasam Android app

Google Play

A personal vault app for keeping assets such as gold and foreign currency, and their movements, in one encrypted place.

React + Vite, Capacitor

SafeCargo Web platform

safecargo.io

Lets you search dangerous goods regulations for road, rail, sea and air (ADR, RID, IMDG, IATA DGR) in Turkish, in one place.

Next.js 14, TypeScript, Tailwind CSS, Fuse.js, Playwright and Vitest, SEO / JSON-LD, CSP / HSTS

Hafıza Tutucum Android app

Google Play

For people who don't want their notes and reminders in the cloud: the AI features run entirely on the phone, without an internet connection.

React Native + Expo, llama.rn (llama.cpp / GGUF), ML Kit, Speech recognition, Zustand, Jest

FocusLife Android app

Google Play

For people who plan their focus time with the Pomodoro method: separate durations for categories such as study, work and sport, plus daily focus statistics.

Expo / React Native

Market Listem Android app
[Google Play](#)

For people who keep a shopping list together with others: lists are shared by link and edited together, and spending is recorded and compared.
Expo / React Native

Education

Computer Programming Anadolu University	2024 – 2026
International Trade and Logistics Management Anadolu University	2018 – 2024
Mining Engineering Dokuz Eylül University	2007 – 2014

Gidiniz Blog Website
gidiniz.blog

A travel blog where my spouse and I turn the places we visit into guides for people planning their own routes.
HTML, CSS, JavaScript, Vercel

Certificates

Dangerous Goods Safety Adviser (DGSA) — ADR · IATA DGR
ISTQB® — Software Testing Certification
Software Development Engineer in Test — SDET Certification
Fullstack Developer — Udemy
Introduction to Software Testing — BTK Akademi

Skills

Frontend: TypeScript, React 19, Next.js (App Router), Tailwind CSS, Vite, Zustand, TanStack Query, React Hook Form, Zod, Framer Motion, Recharts

Backend and data: Supabase, PostgreSQL, Row Level Security, Auth, Realtime, Storage, Edge Functions, Firebase, REST API

Mobile: React Native, Expo (SDK 54–57), Expo Router, Capacitor, EAS Build, Play Console, PWA

Testing and QA: ISTQB, SDET, Playwright (E2E), Vitest, Jest, TypeScript strict, ESLint, Lighthouse CI, Sentry

AI integration: Anthropic Claude API, Google Gemini, OpenAI API, On-device LLM (llama.rn / GGUF), ML Kit OCR, Speech recognition

Infrastructure and release: Vercel, Git / GitHub, CI/CD, Sentry, Resend, next-intl (i18n), SEO / JSON-LD, KVKK / GDPR
