

Suphi Atılım ÇELİKÖZ

Mining Engineer • DGSA • Software Developer • SDET • Founder

From engineering to logistics, from logistics to software. I bring 10+ years of field experience in mining and dangerous goods transport into software, building digital products that solve problems I have personally run into on the job.

From engineering to logistics, from logistics to software

I started my professional career as a **Mining Engineer and permanent site supervisor**. Between 2015 and 2019 I worked in field operations in the mining industry, where I learned technical processes, occupational safety and what regulation actually means on the ground.

In 2019 I moved into **Dangerous Goods Safety Advisory**. I worked on air and road transport of dangerous goods at several organisations, including **FedEx Express**, applying ADR and IATA DGR regulations inside daily operations rather than only reading them.

A straight line from field to code

2007 - 2014

Mining Engineering

Dokuz Eylül University

Where the engineering mindset and the habit of analytical problem solving were formed.

2015 - 2019

Mining Engineer / Permanent Site Supervisor

Mining Industry

Running field operations, supervising technical processes and ensuring regulatory compliance in an environment where production and safety must be managed at the same time.

Field OperationsSafetySupervisionCompliance

2018 - 2024

International Trade & Logistics Management

Anadolu University

Connecting hands-on transport experience with trade and logistics theory.

2019 - 2026

Dangerous Goods Safety Adviser (DGSA)

Air & Road · including FedEx Express

Safety advisory across air and road dangerous goods operations: regulatory compliance, classification, packaging, labelling, documentation, training and internal audits.

ADR IATA DGRClassificationDocumentationAuditTraining

2024 - 2026

Computer Programming

Anadolu University

Putting an academic foundation under years of hands-on software practice.

2026 - Present

Founder • Software Developer

My own software company

Building products that combine dangerous goods safety, logistics and software. Shipped web platforms including TMGD Asistani and SafeCargo, plus transport and everyday mobile applications.
